BACKGROUND

ABOUT

Tech enthusiast, avid reader, life-long learner and thought leader for product tech strategy throughout the career. Also, an open-source enthusiast and part-time contributor in various OSS ecosystems.

WORK EXPERIENCE

Software Engineer,

Mar, 2024 - Present

- Designed user-friendly interfaces for AI-driven maintenance solutions in ReactJS.
- Developed and deployed a web application using ReactJS and Node.js.
- Integrated data visualizations using Highcharts and maintenance schedules with Full Calendar.
- Modernized digital infrastructure for SEIU to streamline communication.
- Leveraged AWS services for business logic implementation and issue resolution.
- Led the technical implementation for Automated Validation component in core application
- Implemented industry standard security practices on core application
- Tech highlights: Elixir, Javascript, Typescript, Node.js, PostgreSQL, AWS, Kubernetes, React, Github Actions, Terraform

Junior Software Engineer,

Mar, 2022 - Apr, 2024

2 years 1 month

- Built tools for recruitment, media production, and data annotation using React.js and TypeScript.
- Developed features like dynamic UIs, API integration, responsive design, and role-based access.
- Worked with VP, directors and tribe leaders and product team on strategic growth and platform maturity
- Worked with various teams for architectural foundations and cloud native SOA converting majority of 20 years old monolith to 20+ microservices
- Reviewed various architectural proposals on high-level system design and code implementations
- Provided leadership guidance for smart and engage initiatives
- Managed cloud platform of Zego
- Engaged in technical diligence in M&A efforts
- Worked with security group and provide code reviews and perform internal pentests
- Designed and developed micro-frontend architecture and template and help teams adopt it
- Tech highlights: Javascript, Typescript, Node.js, .NET Core, PostgreSQL, MongoDB, InfluxDB, AWS, GCP, Kubernetes, Harness, React, React Native, C, C++

SKILLS

DevOps

Amazon Web Services Google Cloud Docker Heroku Micro-services Puppet Linux Windows
NoSQL RDBMS Kubernetes MongoDB

Backend Engineering

Javascript Typescript REST Message Queues Node.js Python Platform Security NoSQL RDBMS
MEAN MERN Alexa Google Actions Kafka MongoDB Authn, Authz, OAuth2, OpenID Connect

Architecture

Domain Driven Design Microservices Service-oriented architecture Enterprise Integration
Low Latency Systems Distributed Systems

Frontend Engineering

HTML CSS Javascript AngularJS D3.js Highcharts Bootstrap React React Native
Micro-frontent

EDUCATION

Computer Application, Master, Indira Gandhi Institute of Technology, Odisha

Aug, 2018 - Jul, 2021

8.64 - A in computer related courses

Computer Graphics Compiler Design Computer Systems Architecture Principles of Programming Languages

INTERESTS

Computer Security

Exploit development

Web security
